Category Drug Class	Formulary Options
Autoimmune and Hepatitis C *	For some clients, an Indication Based Formulary will be utilized for products in these classes and may result in additional products not covered without a medical exception.
Drugs for infusion into spaces other than the blood	A drug which must be infused into a space other than the blood will generally be excluded from the prescription benefit.
Generics	Limited source generics may be evaluated when appropriate and potentially removed from the formulary.
Hepatitis C	As new products launch in this class, all existing products in the class will be re-evaluated to determine appropriate formulary placement and potentially not covered without a medical exception, added back to formulary or not listed.
Hyperinflation	On a quarterly basis, products with significant cost inflation that have clinically appropriate and more cost-effective alternatives may be evaluated and potentially removed from the formulary.
New-to-Market Agents ¹	New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark® National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval.
Specialty	As new specialty products launch, all existing products in the class will be re-evaluated to determine appropriate formulary placement and potentially not covered without a medical exception, added back to formulary or not listed.

The listed formulary options are subject to change.
