

# MHBP Prescription Drug Guide with Advanced Control Specialty Formulary® - Chart

This is a listing of prescription medications within select therapeutic categories for your **MHBP** health plan. **Generics should be considered the first line of prescribing.** If there is no generic available, there may be more than one brand-name medicine to treat a condition. These preferred brand-name medications are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only. This is not an all-inclusive list. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*.

## PLAN MEMBER

MHBP provides you with a prescription benefit program administered by CVS Caremark®. Ask your doctor to consider prescribing a preferred medicine from this list, when medically appropriate. Take this list along when you or a covered family member visit a doctor.

### Please note:

- Your prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. Products recently approved by the U.S. Food and Drug Administration (FDA) may not be covered upon release to the market.
- For specific information regarding your prescription benefit coverage and copay<sup>1</sup> information, visit the CVS Caremark website at [Caremark.com](http://Caremark.com), visit MHBP at [www.mhbp.com](http://www.mhbp.com), or contact a CVS Caremark Customer Care representative at **1-866-623-1441**.
- FDA-approved drugs are included; however, this list is not meant to be a complete list of drugs covered under your plan. Although this drug guide was current at the time of printing, it is subject to change. Additionally, certain drugs on this list may be moved from one category to another. Please call **1-866-623-1441** with any questions about your prescription benefit plan.
- CVS Caremark may contact your doctor after receiving your prescription to request consideration of a drug list product or generic equivalent. This may result in your doctor prescribing, when medically appropriate, a different brand name product or generic equivalent in place of your original prescription.
- In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product to the market.

## HEALTH CARE PROVIDER

Your patient is covered under MHBP, which is administered by CVS Caremark. As a way to help manage health care costs, please authorize generic substitution whenever possible. If you believe a brand-name product is necessary, consider prescribing a brand name shown on this list.

### Please note:

- Generics should be considered the first line of prescribing.
- This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. The member's specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. Products recently approved by the FDA may not be covered upon release to the market.
- The member's prescription benefit plan may have a different copay for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.
- Log in to [Caremark.com](http://Caremark.com) or [www.mhbp.com](http://www.mhbp.com) to check coverage and copay information for a specific medicine.

**FOR YOUR INFORMATION: Generics should be considered the first line of prescribing.** This represents a summary of prescription coverage for MHBP. It is not all-inclusive and does not guarantee coverage. New-to-market products and new variations of products already in the marketplace may not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval. In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product to the market. Specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. The member's prescription benefit plan may have a different copay for specific products on the list. Unless specifically indicated, drug list products will include all dosage forms. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. Generics listed in therapeutic categories are for representational purposes only. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. Log in to [Caremark.com](https://www.caremark.com) to check coverage and copay information for a specific medicine.

An exception process may exist for specific clinical or regulatory circumstances that may require coverage of an excluded medication.

§ Generics are available in this class and should be considered the first line of prescribing.

<sup>^</sup> Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation and package size.

\* The preferred options in this list are a broad representation within therapeutic categories of available treatment options and do not necessarily represent clinical equivalency.

<sup>†</sup> These drugs and others may have restrictions on them including, but not limited to, quantity limits, dosage limits and prior authorization. Please check with your plan. This list is not a complete list of restrictions and is subject to change by your plan.

<sup>1</sup> Copayment, copay or coinsurance means the amount a member is required to pay for a prescription in accordance with a Plan, which may be a deductible, a percentage of the prescription price, a fixed amount or other charge, with the balance, if any, paid by a Plan.

<sup>2</sup> An ACCU-CHEK or ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ACCU-CHEK or ONETOUCH. For more information on how to obtain a blood glucose meter, call: 1-877-418-4746.

<sup>3</sup> BD ULTRAFINE syringes and needles are the only preferred options.

<sup>4</sup> ACCU-CHEK or ONETOUCH brand test strips are the only preferred options.

<sup>5</sup> Generic prenatal vitamins and CITRANATAL are the only preferred options.

<sup>6</sup> Long Acting Insulins - First Generation.

<sup>7</sup> Long Acting Insulins - Second Generation.

This list contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers.

Listed products are for informational purposes only and are not intended to replace the clinical judgment of the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.
